EDUCATION

California Polytechnic State University, San Luis Obispo — Expected June 2030
Bachelor of Science in Mechanical Engineering, Concentration in Mechatronics
Junior standing, 40% degree progress

The King's Academy PSP, Sunnyvale | High School Diploma — June 2026
GPA: 4.37 (weighted)

ENGINEERING EXPERIENCE

Mechanical & Avionics Team Member — PolyUAS — August 2026 — Present

- Owned end-to-end design process of a quick-release payload mounting interface, from initial concept development through iterative CAD design and refinement.

Mechatronics Engineering Intern — TurbineOne — June 2025 – June 2026

- Collaborated with a small team of engineers to develop a quadcopter proof of concept and evaluate its potential for further investment which eventually led TurbineOne to launch a *drone research facility*
- Designed, manufactured, and prototyped core quadcopter components and mechanisms for improved durability and reliability using CAD and additive manufacturing
- Developed and integrated a custom drone flight controller, including sensor fusion, calibration, and filtering; nested PID loops; and other control algorithms such as Kalman filters
- Integrated wireless communication and telemetry systems and conducted iterative flight testing to guide future design improvements

Robotics Team Captain — Live Oak Robotics Team — August 2024 — June 2026

- Coordinated team members (10-15 active members), directed robot development, and designed and manufactured core robot mechanisms using CAD and additive manufacturing
- Led team to two consecutive wins at the annual PiE robotics competition
- Founded an open-access robotics club to provide hands-on learning opportunities to any student
- Planned and led workshops on CAD, soldering, and robotics fundamentals

3D Printing Workshop Organizer and Instructor — The King's Academy — August 2024

- Organized and taught a workshop covering 3D printer assembly, operation, and troubleshooting for K-12 students at The King's Academy
- Managed workshop logistics, materials procurement, promotion, and participant communications

TECHNICAL SKILLS

Computer: CAD (Fusion360, Onshape, SolidWorks), basic C++ & Python, engineering drawing & GD&T
Equipment: 3D printing (FDM & SLA), manual lathe operation, CNC milling, soldering
